Shop 1.5.3 Bug Fixing

This update will be workable if the installed version is 1.5.3 .

1. Log in to your cPanel. Open File Manager.

2. Open the folder where your running script is located.

3. Upload the application.zip file from updates/1.5.3 Bug Fixing/ application.zip which is downloaded
   from CodeCanyon to your server where your script is running.

4. Extract the zip file in the root directory of the running script. (Example: if your script is located in
   the public_html/shop in the server. Then, public_html/shop is the root directory.)

5. Go to PhpMyAdmin and open the database of your running script.

6. Import the sql file which is provided in the '1.5.3 Bug Fixing' folder.
